Academic Projects

- **Hospital Management System**(Duration Feb 2023- March 2023)

Contributed to a team project built a hospital management system. The website provides a seamless experience for an admin to computerize the Front Office Management of Hospital to develop software which is user friendly, simple, fast, and cost effective. It deals with the collection of patient's information, diagnosis details, etc.

- Designed and implemented a patient management system for tracking patient data, appointments, and medical history
- Developed an appointment scheduling system with reminders and notifications
- Created a secure login system for doctors, nurses, and administrators
- Implemented electronic medical records (EMR) system for storing and retrieving patient data

- **Online Food Recipe Website**(Duration July 2023 - Aug 2023)

Designed and Developed a user-friendly recipe website. This website provides a seamless experience for learning about different types of recipes. In an online cooking website, users can explore a vast variety of recipes. Here in this project, we can add most of the filtrations like searching the recipe by category, courses, cuisine, international, main courses, Continental, etc.

- Developed a responsive website using HTML, CSS, and JavaScript.
- Implemented search and categorization functionality for easy recipe discovery
- Wrote and edited recipe content, including descriptions, ingredients, and cooking methods.

Personal Projects

- **Personal Portfolio Website**

Designed and developed a personal portfolio website to showcase my skills, projects, and experiences, demonstrating my expertise in front-end development, UI design, and content creation.

- Developed a responsive website using HTML, CSS, and JavaScript
- Designed a visually appealing and user-friendly interface with a modern design
- Created a project section to showcase my personal and academic projects
- Integrated social media links and contact information

Tools and Technologies: HTML, CSS, JavaScript and GitHub (version control)

- **Clone Projects**

- Netflix Clone: Developed a functional clone of Netflix's website using HTML, CSS, JavaScript, showcasing understanding of front-end and back-end development.
- Amazon Clone: Built a simplified version of Amazon's e-commerce platform using HTML, CSS, JavaScript, and PHP, demonstrating skills in web development and database integration.

Certifications

- Full stack Development (Jspiders)
- Full stack web Development (Udemy)
- UI/UX (MyCaptian)
